   b. Boma Road Watermain Extension
      - Becher Hoppe prepared a cost estimate for watermain extension to and along Boma Road:
         Option 1 - Watermain extension along the south side of STH 33 and boring under STH 33 to Boma Road. This estimate is based off open trench excavations, except for the crossing, and no excavation. Total cost estimate, $169,000.00.
         Option 2 - Watermain extension using 8-inch PVC watermain to serve customers along Boma Road. A potential assessment was computed by combining the existing 34 homes along Boma Road and an additional 11 new homes (45 total). Peterson suggests that the number new homes be reduced to 4-5 new homes, making assessments approximately $20,000 for most homes. 2 property owners that have significantly more road frontage would be assessed more by a formula to be determined later. Total Cost estimate, $681,000.00.
         Option 3 - If the Sanitary District would like to use the extension along Boma Road to serve the areas in the “Ridge,” the watermain should be upsized to 10-inch. The additional cost to up size the watermain along Boma Road to 10-inch would be approximately $81,000.00.
b. Boma Road Watermain Extension, cont.
   - Peterson will be forwarding Becher Hoppe’s preliminary numbers to Ehlers to prepare cost proposals. Ideally, Ehlers’ evaluation would be available in April.
   - Peterson proposed the next public meeting with Boma Road residents occurs in May.
